

Prompt Used

Create a professional one-page. Make it straight to the point and realistic, but not rigid. Use a comprehensible format and proper sectioning across the resume. Here are the following details:

Name: Tristan James M. Cabato

Email: tcabato@addu.edu.ph

Phone: 0926 723 9392

Education:

Maryknoll School of Santo Tomas – 2010-2024 – Primary School and Highschool

Ateneo de Davao University – 2024-Present – College, Bachelor of Science in Computer Science

Skills:

- Video Editing, Digital Drawing, DAW-based Music, Animation, Story-Writing, Web Development, Game Development, and Scripting.

Projects/Experience:

2017-2019 : Editorial Journalism

2019 : Digital Art Commission Artist

2025 : Lamppost Installation Community Service

February 2026 – Present : Desktop Pet Engine via Gamemaker

Tristan James M. Cabato

(Gemini)

Davao City, Philippines Phone: 0926 723 9392

Email: tcabato@addu.edu.ph

Education

Ateneo de Davao University | *Bachelor of Science in Computer Science 2024 – Present*

Maryknoll School of Santo Tomas | *Primary & Secondary Education 2010 – 2024*

Technical Skills

- Development: Web Development, Game Development, Scripting (GML, etc.)
 - Creative Suite: Video Editing, Digital Drawing, 2D Animation
 - Audio/Writing: DAW-based Music Production, Story-Writing & Narrative Design
-

Projects & Experience

Desktop Pet Engine | *Lead Developer February 2026 – Present*

- Developing a functional desktop pet application using the GameMaker engine.
- Implementing custom scripting for interactive behaviors and system-tray integration.

Lamppost Installation (Community Service) | *Volunteer 2025*

- Collaborated with a team to provide essential infrastructure for local community safety and lighting.

Digital Art Commissions | *Freelance Artist 2019*

- Managed end-to-end client relations, from initial conceptual sketching to final digital rendering and delivery.

Editorial Journalism | *Writer/Contributor 2017 – 2019*

- Synthesized complex information into concise, engaging editorial pieces.
 - Developed a foundational grasp of professional communication and deadline management.
-

Summary of Qualifications

A versatile Computer Science student with a strong intersection between technical development and digital artistry. Proven ability to bridge the gap between code and creativity, ranging from game engine scripting to narrative-driven content creation. Enthusiastic about building interactive experiences and contributing to community-centric projects.

EDUCATION

Ateneo de Davao University

Bachelor of Science in Computer Science

2024 – Present

Maryknoll School of Santo Tomas

Primary & Secondary Education

2010 – 2024

SKILLS

- Video Editing & Animation
 - Digital Illustration & Drawing
 - DAW-Based Music Production
 - Story Writing & Creative Development
 - Web Development (Front-end/Basic Back-end)
 - Game Development (GameMaker)
 - Scripting & Basic Programming
-

PROJECTS & EXPERIENCE

Desktop Pet Engine (GameMaker)

February 2026 – Present

- Developing an interactive desktop companion application using GameMaker
- Implementing animation systems, user interaction, and scripting logic

Lamppost Installation – Community Service

2025

- Participated in a community initiative focused on improving local infrastructure
- Collaborated with a team to complete installation tasks efficiently

Digital Art Commission Artist

2019

- Created custom digital illustrations based on client requests
- Managed client communication and delivered outputs within deadlines

Editorial Journalism

2017 – 2019

- Contributed written content for school publications
 - Developed research, writing, and editing skills
-

ADDITIONAL PROFILE

Creative and detail-oriented Computer Science student with a strong interest in game development, multimedia production, and storytelling. Combines technical skills with artistic creativity to build engaging digital experiences.

PROJECTS & EXPERIENCE

Desktop Pet Engine

Feb 2026 - Present

Developing a custom desktop pet application engine in GameMaker Studio. Focused on lightweight system integration, sprite-based animation, and interactive character behavior — an ongoing personal engineering project.

GameMaker

Game Dev

Animation

Lamppost Installation — Community Service

2025

Participated in a community outreach initiative involving the installation of lampposts, contributing volunteer time and coordination effort to improve public infrastructure in the local community.

Community Service

Volunteer

Digital Art Commission Artist

2019

Accepted and fulfilled digital art commissions, working directly with clients to produce original character designs and illustrations to specification. Developed an early sense of creative discipline and client communication.

Digital Drawing

Freelance

Editorial Journalism

2017 - 2019

Contributed to school editorial publication over two years. Wrote and edited articles, collaborated with a student editorial team, and developed strong foundations in structured writing, fact-checking, and clear communication.

Comparison Table

Criteria	Gemini	ChatGPT	Claude
Structure	5/10	6/10	10/10
Clarity	5/10	9/10	10/10
Formatting	4/10	7/10	10/10
Overall Quality	5/10	7/10	10/10

As seen in my tabular scoring, I am very much leaning towards Claude, particularly its Sonnet 4.6 model. It does seem unfair because I fully did not expect Claude to automatically activate Create mode, beating the other 2 LLMs just from design alone. Claude's output is more cohesive, more stylized, and emphasizes on the right things.

That however is not to say that ChatGPT and Gemini underperformed, I already had a low bar for it. Gemini, unless having Code or Image generation activated, underperforms in generating lengthy texts, it doesn't help that I was using the Fast mode too. As for ChatGPT, I do have some disappointments considering how it's the leading AI model. Not only am I disappointed from the formatting (or the lack thereof) but in the rigidity of how it presents the information even as it reassures at the reply that it avoids such. If we're going to read from information alone, then ChatGPT has fallen short from my expectations.

Obvious difference of Claude and the other 2 LLMs aside, I have noticed that all models have tried to be unique in sectioning information. In terms of cleanliness, ChatGPT looks more cohesive in contrast to Gemini, again only being beaten by Claude which generated an HTML page. There is also a subtle tonal shift in that Gemini attempts to overexaggerate my roles possibly because I didn't specify, whereas ChatGPT and Claude are more grounded and present it properly.

I didn't change much in my final output, 95% of it is still Claude, but I took the ChatGPT signature style of somehow always adding an emoji in place of words. Because Claude is just high-end in general, in this Laboratory, I learned that higher end models overcompensate or overdo in every areas the broader the instructions they receive.
