

Laboratory 9 – Replit Website Creation

Option B (Business Page)

Initial Prompt : “Using tailwind integrated html and Javascript alone, create a mockup business website focusing on digital artistry commissions such as drawing commissions, 3d modeling, or simple programming commissions.”

Mastery across mediums.

We don't just draw or code. We architect complete digital experiences across three core disciplines.

2D Digital Art

Character design, concept art, and stunning illustrations crafted with meticulous attention to lighting, composition, and mood.

3D Modeling

High-fidelity hard surface and organic models. From game-ready assets to cinematic renders with perfect topology.

Creative Tech

Custom web applications, interactive experiences, and creative coding that brings static assets to life.

Curated Gallery

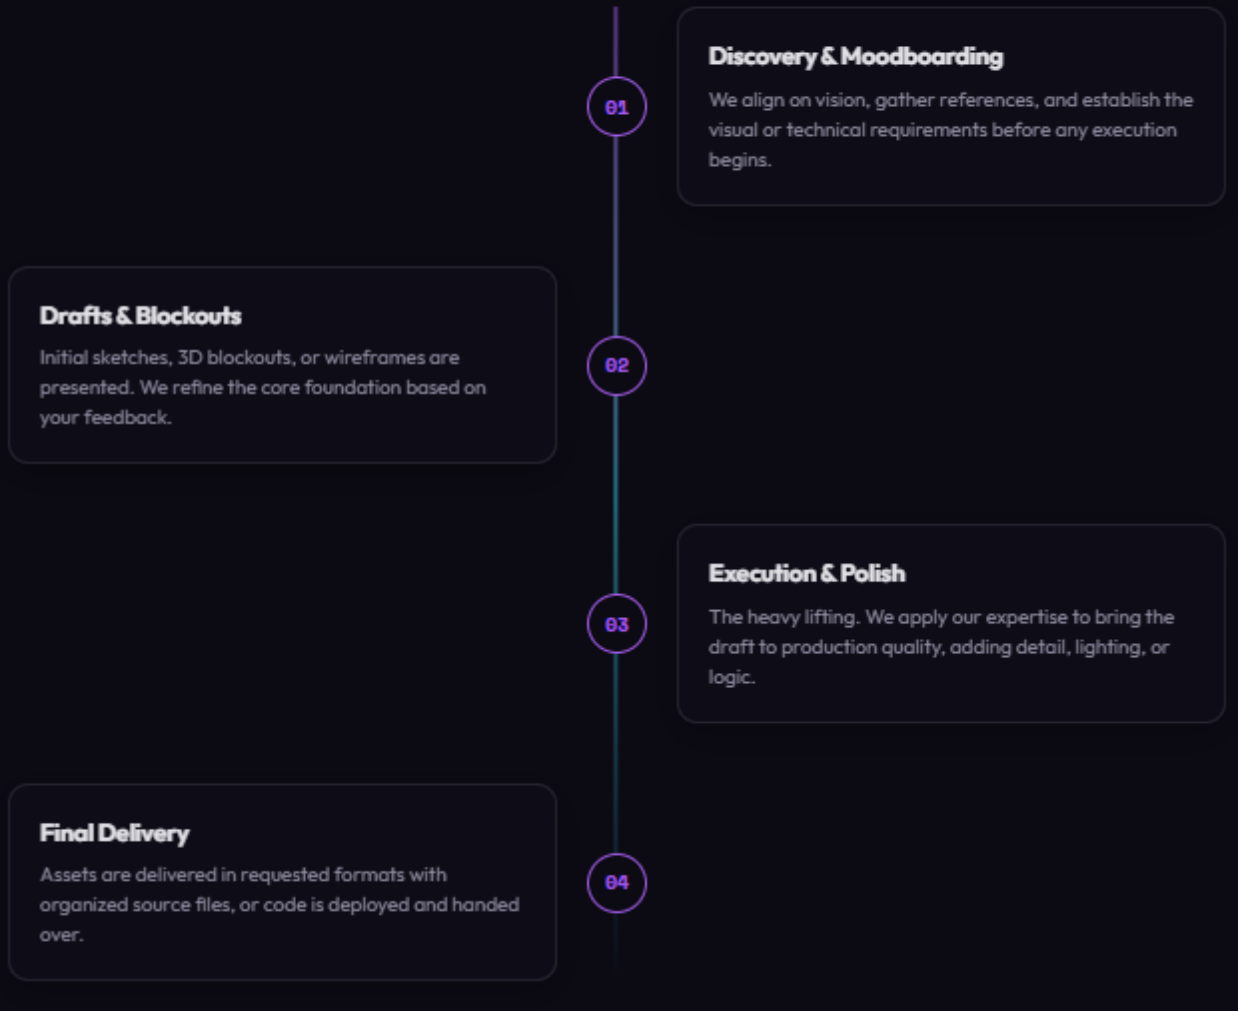

A selection of our latest commissions across all disciplines.
Quality is our only metric.

View All

How we work.

A transparent, collaborative pipeline from concept to final delivery.

Investment

Transparent baseline pricing. Every project is unique, but this is where we start.

MOST REQUESTED

2D Illustration

From \$350

High-end character design, concept art, and full scenes.

- ✓ High-res delivery (4K+)
- ✓ 2 Revision rounds
- ✓ Commercial rights available
- ✓ Source PSD file (+50%)

Inquire Now

3D Modeling

From \$600

Game-ready assets, characters, or cinematic renders.

- ✓ Optimized topology
- ✓ PBR Texturing (4K)
- ✓ Rigging available
- ✓ Source files (.blend/.blend)

Inquire Now

Creative Tech

From \$1,500

Custom web experiences, portfolios, and interactive apps.

- ✓ Modern tech stack (React/Vite)
- ✓ Responsive design
- ✓ Custom animations
- ✓ Source code delivery

Project Details

Describe your vision, timeline, and any specific requirements...

Submit Inquiry

Prompt 2 : “In the mediums section (where 2D Digital Art, 3D Modeling, etc.) are displayed, make it so that when it is clicked, it shows a preview screen of sample products for each of it. In the 'How we work' section, add fading-edge images of processes like using blender, finding reference materials, sketching, etc.”

How we work.

A transparent, collaborative pipeline from concept to final delivery.

01

Discovery & Moodboarding

We align on vision, gather references, and establish the visual or technical requirements before any execution begins.

01-0001 - Moodboard.jpg

01-0002 - Moodboard.jpg

02

Drafts & Blockouts

Initial sketches, 3D blockouts, or wireframes are presented. We refine the core foundation based on your feedback.

03

Execution & Polish

The heavy lifting. We apply our expertise to bring the draft to production quality, adding detail, lighting, or logic.

04

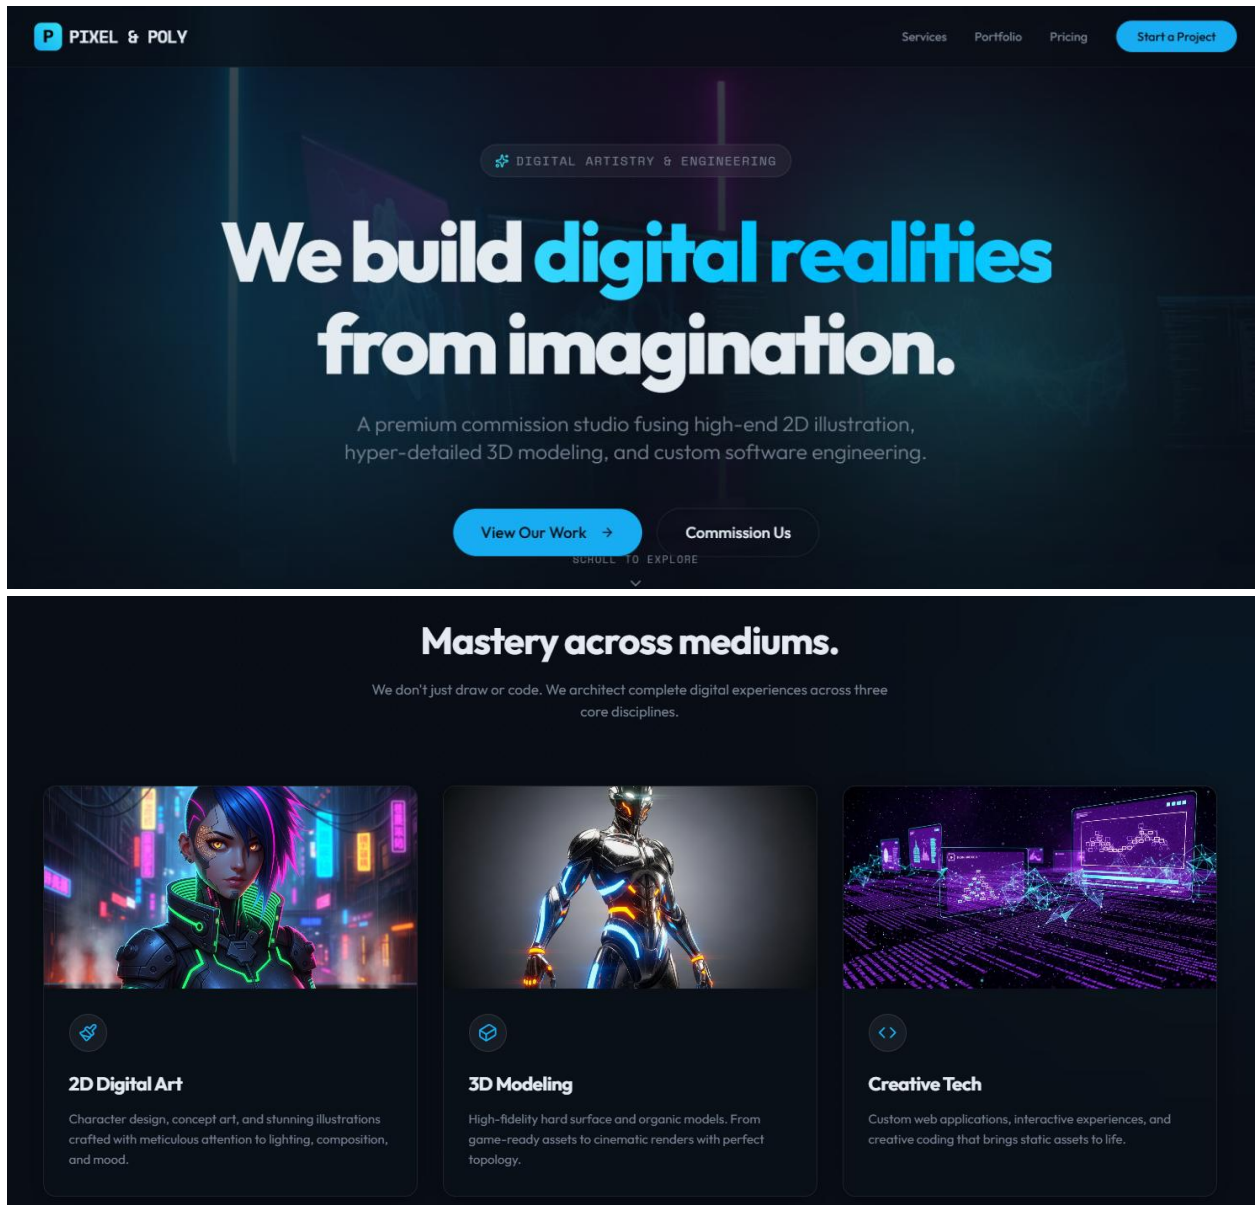

Final Delivery

Assets are delivered in requested formats with organized source files, or code is deployed and handed over.

03-0001 - Moodboard.jpg

03-0001 - Moodboard.jpg	03-0001
03-0002 - Moodboard.jpg	03-0002
03-0003 - Moodboard.jpg	03-0003
03-0004 - Moodboard.jpg	03-0004
03-0005 - Moodboard.jpg	03-0005
03-0006 - Moodboard.jpg	03-0006

Prompt 3 : “Use slate-600 and sky color schemes for the whole page. Just like the landing page, make the other sections have subtle wallpapers instead of just static colors too.”

Final Reflection:

- **What worked well?**
 - I didn't expect Replit to be able to generate such a long webpage considering how it usually equates to a high token usage in other AI models. Replit was able to follow my instructions well relative to how broad I made it to be.
- **What needed manual fixing?**
 - I personally didn't need to manually fix anything, in fact, my prompts could have been something I could manually do once the first iteration was shown to me.
- **What did you learn about prompting?**
 - I don't know what dataset Replit trains under, but I've learned that AI models that specialize in how they are advertised (Coding in Replit's case) get better and better at it the more it is used.
